DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 10, 11, 12, 18, 19 are rejected under 35 U.S.C. 102(a) as being anticipated by Yao et al. (U.S. Patent 6,097,176).

Regarding claim 10:

Yao discloses a battery management system for managing a battery pack of an electric or hybrid vehicle, the battery pack including a plurality of batteries, including a first interface component in electrical communication with the battery pack for receiving a first parameter of each battery in the battery pack (fig. 1-3 Col. 2-3, Lines 45-65), a second interface component in selective electrical communication with the first interface component (fig. 1-3 Col. 2-3, Lines 45-65); a processor in electrical communication with the second interface component (fig. 8-13), the circuit measuring the first parameter of one of the batteries in the battery pack, determining an average of first parameter values of the remaining batteries in the battery pack, the average first parameter for remaining batteries changing depending on which battery of the battery pack is being tested at a given instant. and comparing the measured first parameter value to the average

Art Unit: 2863

to obtain a result (fig. 1-3, Col. 3-4, Lines 5-35, (Col. 11, Lines 21-30); an output device for signaling an operator if the result is outside given range, else a memory storing the result (fig. 7, 8, Col. 2-3, Lines 45-65).

Regarding claims 11, 12, 18, 19 :

Yao discloses the first parameter is battery conductance, impedance (Col. 4, Lines 30-35), works in network communication with computer (Col. 2, Lines 13-25).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 1, 2, 3, 6, 7, 8, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yao et al. (U.S. Patent 6,097,176) in view of Bullock et al. (U.S. Patent 5,623,195).

Regarding claim 1:

Yao discloses a method for testing a battery pack of an electric or hybrid vehicle, the battery pack having a plurality of batteries including measuring a first parameter of a battery in the battery pack (Col. 2-3, Lines 45-65); determining

Art Unit: 2863

an average of first parameter values of the remaining batteries in the battery pack (Col. 11, Lines 21-30), the average first parameter value for remaining batteries changing depending on which battery of the battery pack is being tested at a given instant (Col. 11, Lines 21-30); Comparing the measured first parameter value to the average to obtain a result (Col. 2, Lines 26-35); storing the result of the comparison (Col. 2, Lines 26-35); the measuring, determining, Comparing and outputting or storing repeated until each battery the battery pack has been tested (Col. 2, Lines 13-25).

Regarding claim 2, 3, 9:

Yao discloses the first parameter is battery conductance, impedance (Col. 4, Lines 30-35); use of a display screen (fig 7-9).

Yao does not disclose the use of an alert signal, audible signal, visual signal, a light, to signal the operator, Bullock disclose the use of an alert signal, audible signal, visual signal, a light in order to alert the maintenance staff for proper action (abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Yao to have the use of an alert signal taught by Bullock in order to alert the maintenance staff for proper action (abstract).

Claim Rejections - 35 USC § 102

3. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitation of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: prior art fail to teach the use of touch screen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
